

School-Year 2023-24 Program Evaluation Results

May/June 2024

RESPONDENTS

206

+BOX program participants responded on behalf of their household.

- English: 49%
- Spanish: 46%
- Chinese: 5%

Throughout May & June, we partnered with participating schools to survey +BOX families to evaluate the impact that +BOX is having in our communities and determine its lasting effects in relation to intended program outcomes. Surveys were conducted in both digital and paper versions and provided in three different languages: English, Spanish & Chinese.

RESULTS

Health & Wellness

Level of improvement to overall household health & wellness since receiving +BOX

Significant Improvement

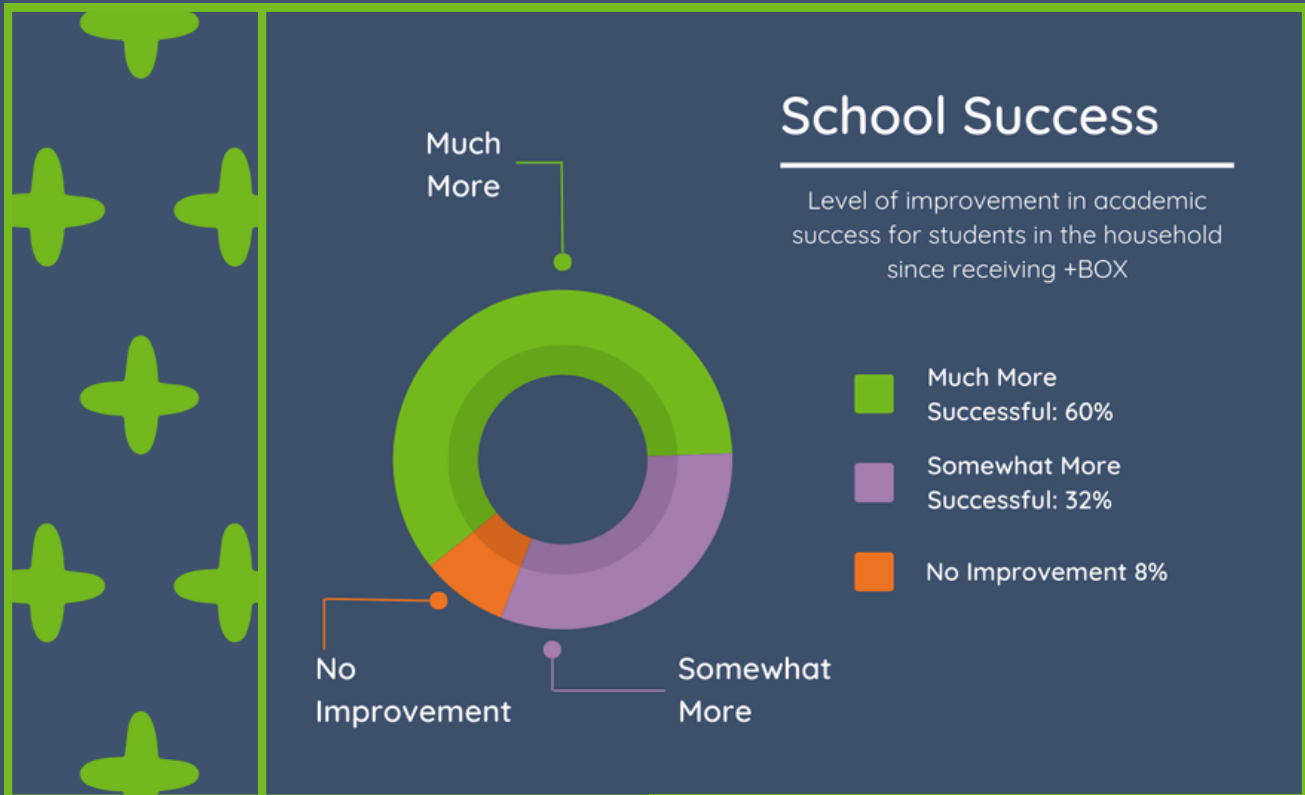

No Improvement

Some Improvement

- Significant Improvement: 82%
- Some Improvement: 17%
- No Improvement: 1%

Our goal is to increase household food security, fuel student achievement and improve the long-term health and wellness of the families we serve. Our program evaluation survey reveals that families participating in the +BOX program are experiencing significant improvements in health & wellness, and overwhelmingly so (82%), while most of the children in +BOX households have experienced at least some improvement in academic success, including a majority (60%) who have had much more success in school since participating in the program.

Expanding access to healthy food is one of our core principles and the evaluation results continue to verify our approach. Families participating in the +BOX program confirm that +BOX is the most accessible food assistance program supporting their communities.

+BOX will continue to consistently evaluate our program, engage our communities and hold ourselves to the high standard established by these results.
